WESTLAKE, Ohio, July 30, 2014 (GLOBE NEWSWIRE) -- via PRWEB - For more than 35 years, [EDI VANs](#) have been invoicing companies based on the number of kilo characters they send and/or receive. This creates a confusing, hard to manage fee structure that is grossly inflated.

Today, with billions of people online, cloud infrastructures, and advanced networks, the cost of moving data is a fraction of what it used to be. The number of trading partners more accurately reflects the effort required to support its customers. As a result, BOLD VAN allows unlimited data; BOLD VAN customers typically save 40% - 80% per month.

BOLD VAN is built on a secure, feature-rich infrastructure that boasts industry leading 99.99+% uptime and unparalleled personal customer support. BOLD VAN's global platform routes over 1.8 million interchanges to tens of thousands of trading partners each month.

Within BOLD VAN's state-of-the-art online portal, customers can search, view and reprocess documents. Unlike other [value added networks](#), BOLD VAN's portal provides access to data for a minimum of 90 days.

How does BOLD VAN pricing work? Each month customers are only billed for the number of [trading partners](#) with whom they exchange data. The bill is that simple and never includes any fees based on amount of data exchanged. BOLD VAN's new service is quick and easy to setup: users simply subscribe online and their mailbox is created and activated within minutes. Subscribers are sent a link to create their profile and a test document is placed in their mailbox.

BOLD VAN's message to anyone that exchanges EDI data: Be a hero. Show your organization you care about its well-being. BE BOLD! Sign up today and start saving with BOLD VAN, the pioneer in trading partner pricing.
